## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 42 - 57, drawn to format information of data, classified in class 348, subclass 467.
- II. Claims 1 – 41 and 58 - 67, drawn to controlling video processing from format information of data, classified in class 348, subclass 474

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination (claims 42 – 57) recite a transmitter and/or receiver for receiving and processing format information. The subcombination has separate utility such as processing of the format information to create a mask for filtering.
